

### Introducing Genie from Syrp.

Capture time lapse, panned and linear shots you never before thought possible with this user friendly, lightweight & low cost system.

Designed to be part of your regular camera kit the system is ideal for HD video and stills capture.

It can be used on a slider using the Syrp linear mount and high performance rope accessory. **Genie can travel much further than conventional time lapse equipment, you are only restricted by the length of your rope.**

Genie also works well on DIY projects e.g pulled on skateboard, home made cable cam.

Please contact SeeSense for further details of Genie and compatible systems:
